

## **KADMAR SHIPPING EGYPT**

### **Airfreighted Spares Dispatch Details**

**Nearest Airport:** Cairo International Airport

#### **Consignee / Delivery Details**

Ships Spares in Transit

M/V "XXXX"

XXX PORT

C/O Agents

(shall revert with the address based on the destination).

#### **Required Documents / Details**

**Kindly provide the following:**

1. Copy of AWB.
2. Detailed Proforma Invoice showing number of units and description of each item.
3. Packing List.
4. Flight details after dispatch of spares to arrange customs clearance and transportation to the vessel.
5. Shipper CargoX platform registration number to obtain the ACID No.

#### **Required Details on Shipping Documents**

**Please include the following on AWB and cargo documents:**

ACID No.: XXXXXXXXXXXXXXXX

Egyptian Importer Tax ID: XXXXXXXXX

Foreign Exporter Registration Type: XXXXXXXXXXXXXXXX

Foreign Exporter ID: XXXXXXXXXXXXXXXX

Foreign Exporter Country: XXXXXXXXXXXXXXXX

Foreign Exporter Country Code: XX

ACID No. must be mentioned on all shipping documents including Commercial Invoice, AWB, Packing List, Certificate of Origin, etc.

Egyptian Customs Authority (ECA) will not accept documents not matching the above requirements.

### Customs Clearance Notes

1. Original Proforma Invoice must be sent together with the shipment and AWB (not inside the shipment).
2. Customs clearance can only start from the 2nd day after spares arrival.
3. Normal customs clearance takes around 3–4 days excluding Fridays, Saturdays, and official holidays.
4. Spares from Japan / made in Japan require additional time (around 4 days) due to radiation inspection.
5. Chemical shipments require more than 4 days for inspection in addition to normal clearance time.
6. Communication-related spares require special approval which may exceed one month.
7. Medicine shipments require prior checking with authorities and may require additional 2–3 days for drug analysis tests.

### Special Requirements

#### **Chemicals:**

1. MSDS is mandatory and must be signed and stamped (wet stamp) by the supplier.
2. Original stamped MSDS shall be sent by courier for customs presentation.

#### **Medicines:**

Packing list copy shall be provided in advance for authority review as some medicines may be prohibited for import into Egypt.

## **Mandatory Implementation of Advance Cargo Information (ACI) for Air Freight Shipments to Egypt – Effective 1-Jan-2026**

Please be advised that the Egyptian Customs Authority, under the Ministry of Finance, has announced the mandatory implementation of the Advance Cargo Information (ACI) system for air freight shipments destined to Egypt, effective 01 January 2026. This extends the existing ACI requirements (previously applied to sea freight) to all air cargo consignments arriving at Egyptian airports.

The ACI initiative is part of Egypt's broader customs digital-transformation strategy to streamline customs clearance, enhance risk management, reduce administrative costs, and improve supply chain transparency.

The Advance Cargo Information (ACI) system requires shipment-level cargo data (such as commercial invoice details, item descriptions, HS codes, exporter/importer identifiers, etc.) to be submitted electronically before shipment departure from the origin country.

Once submitted and approved, a unique ACI Declaration number (ACID) is issued. This ACID must be included in all shipping documents (e.g., AWB, commercial invoice, packing list, certificate of origin) and uploaded ahead of shipment departure. Shipments that do not comply with this requirement may be refused entry, delayed, or returned upon arrival in Egypt.

The ACI process is conducted through the National Single Window for Foreign Trade ('Nafeza') — an integrated electronic platform that centralizes customs and regulatory procedures in Egypt. Nafeza was developed and is operated by Misr Technology Services (MTS) under contract with the Egyptian Ministry of Finance and the Customs Authority.

Nafeza is Egypt's unified trade portal for submitting advance shipment data and obtaining ACID numbers.

Misr Technology Services (MTS) is the technology operator behind the Nafeza platform, delivering the national Single Window infrastructure that supports ACI and other trade facilitation services.

ACI filings for air freight require coordination with both importers (who request the ACID through Nafeza) and exporters/shippers (who prepare and upload the shipment electronic data) via integrated channels (e.g., CargoX blockchain document transfer or other supported data interfaces).

**Important:** Exporters and freight forwarders must register on the Nafeza platform (in coordination with Egyptian importers or designated agents), obtain necessary credentials (e-signature units/e-tokens), and ensure correct submission of all required data prior to departure.

All relevant teams and partners are required to:

1. Register on the Nafeza platform and complete any onboarding requirements (user accounts, digital signatures, data access authorization).
2. Ensure ACID issuance and correct inclusion of the ACID number on all air shipment documentation.

3. Coordinate in advance with Egyptian importers or their customs brokers to submit cargo data via Nafeza before shipment departure.
4. Confirm that ACI pre-registration processes are completed prior to cargo departure, including manifest uploads and transport documentation verification.
5. Train customs compliance teams and carriers on the updated procedures to avoid non-compliance penalties, delays, or cargo rejections.

January 1, 2026 — all air freight shipments destined for Egypt must comply with ACI requirements. Shipments arriving after this date without verified ACI documentation risk being denied entry or facing significant delays.

For assistance with Nafeza registration, ACID validation, or ACI filing support, please contact [E.G.L. Airfreight logistics support dept. Mr. Mohamed El Shimy Mobile +201272006078 e-mail: [aircargo@eglegypt.com](mailto:aircargo@eglegypt.com)] or consult the official Nafeza portal: <https://www.nafeza.gov.eg>.
